

Acknowledgments

We are grateful to all those who were kind enough to discuss some of the ideas presented in this book and contribute with comments and suggestions on earlier versions of some chapters, they were most helpful. In alphabetic order: Amanda Hungerford, Andrew Rowan, Avi Norowitz, Brooklyn Wagner, Daniel Yukimura, Elsa Negro-Calduch, Ivelisse Robles, Kaitlin Wurtz, Lauren Dawson, Lewis Bollard, Michael St. Jules, Pedro Salinas and Valerie Monckton.

Daniel López Yukumura helped us with the statistical intricacies of the model and Herikle Mesquita is the wizard behind the development of the analytical platforms. Olga Kurkina developed the beautiful scientific illustrations for this book, and Robson José da Silva Rezende, Diego da Costa Inácio and Ricardo Martinez Agudelo helped in the implementation of the processograms. The cover and layout of this book was created by Veronica Roca and the ebook and paperback format were produced by Pratibha Saini.

Finally we are very grateful to the Open Philanthropy Project for the financial support that made the implementation of this project possible.
